Why Schools Choose LearningX

Curriculum Ready

Complete, aligned syllabuses for Grades 6–12 covering fundamentals to advanced topics.

Hands-On Labs

Turnkey lab setups with robotics, IoT and maker kits — practical learning from day one.

Expert Instructors

Qualified trainers and industry mentors available online and onsite for sustained impact.

Student Outcomes

Project portfolios, certification pathways and placement support to showcase success.

Our 100% Working School Module

LearningX delivers a tested, scalable implementation plan: needs assessment, lab design, teacher training, curriculum rollout and ongoing support. We guarantee practical adoption — teachers trained, labs operational, students engaged.

Assess

Onsite audit and customised roadmap for your school.

Equip

Lab hardware, software licences and cloud resources.

Train

Teacher upskilling workshops and mentor pairing.

Launch

Student cohorts, project briefs and evaluation cycles.

Scale

Periodic reviews, inter-school competitions and alumni tracking.

Curriculum Highlights

- Foundations: Digital literacy, Office tools, Internet safety
- Creative: Graphics, UI/UX, multimedia storytelling
- Web & Apps: HTML/CSS, JavaScript, responsive design
- Advanced: Machine learning basics, ethical AI, model projects
- Robotics & IoT: Hands-on kits, sensors, real-world challenges

Each module includes teacher notes, assessment rubrics and project templates.

Measuring Success – Student & School Impact

85%

Student Engagement

Average increase in hands-on participation after 1 term.

70%

Skill Proficiency

Students reaching competency benchmarks within 6 months.

50%

Placements & Internships

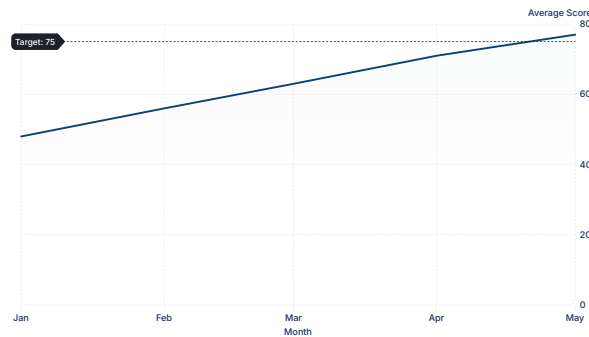

Proportion of learners securing internships or competitive project roles.

We track outcomes and share easy dashboards for administrators and parents.

Digital Platform & Assessment

Cloud LMS with blended learning: video lessons, coding sandboxes, automated quizzes and live mentor sessions. Built for low bandwidth and mobile access.

- Progress dashboards for teachers and heads
- Auto-graded assignments and rubric exports
- Parent access and reporting

Example: Average class scores rising as curriculum matures — goal line indicates target proficiency.

Student Pathways & Recognition

Certification

Levelled certificates aligned to industry foundations and school credits.

Competitions

Inter-school challenges that highlight talent and build confidence.

Mentor Tracks

Top students trained as peer mentors – leadership and career readiness.

Rollout & Communications

We provide ready-to-send format / PDF brochures and email/WhatsApp templates so you can reach everywhere quickly. Materials include:

- Implementation timeline and courses breakdown
- Teacher training schedule and sample lesson plan
- Parent FAQ, student pathway brochures and success stories

☐ We are mentioning that school logo or school brand everywhere, we'll place it on every PDF and email template for consistent branding.

Partnership Models & Pricing

Starter

Curriculum + remote teacher training, DIY lab checklist, ideal for pilot classes.

Standard

Turnkey lab setup, onsite training and 12 months platform access.

Premium

Full implementation, dedicated mentor, inter-school events and placement support.

Custom quotes available. Financing options and phased payment plans for government and private schools.

Get Started with LearningX

Connect with LearningX today, transform your computer department into a centre of excellence. We'll send a branded PDF and an email/WhatsApp packet with next steps, pricing and a proposed pilot schedule.

Contact

Email: learn@learningx.xyz

Phone: +91 95372 31310

Next Step

Request a free school audit and demo week - limited pilot slots available.

Branding

We'll include your school logo on materials and showcase early student work in our regional spotlight.

Connect - Pilot - Grow. LearningX: the best tech education partner for your school, town, state and country.
